Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-8 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Gollobin et al U.S. Pat. No. 5,330,438.

Gollobin discloses a protector sheath comprises: a cylindrical main body, at least three slit provided in a side wall of the main body, and wherein each of said three slits (36) comprises a proximal end portion having a slot (42) with a closed end and capable of accommodating the wing of the winged needle (figs. 2-8), a middle portion parallel to the axis of the main body (figs. 2-4, 7 and 8) and a distal end portion having a shallow V shape or an arched shape (distal end portion of figs. 2-4, 7 and 8)), the proximal end portion of the slit being configured such that it receives the wing so that the needle tube of the winged needle is arranged parallel to the axis of the main body (fig. 8), and the shallow V shape or arched shape slit of the distal end portion slit being arranged to extend in a direction that is not parallel to the axial direction of the main body (figs. 3, 4, 7 and 8); as to claims 3-5, (figs. 2-8); as to claims 6-9, (figs. 2 and 4); as to claim 10, (fig. 3); as to claim 11, (fig. 2); as to claim 12, (fig. 4).

Response to Arguments

Applicant's arguments with respect to claims 1, 3-8 and 10-12 have been considered but are moot in view of the new ground(s) of rejection. Applicant has amended the claims, therefore, the examiner's rejection has changed.

However, the examiner will briefly respond to applicant arguments. The prior art clearly discloses claim 1 as amended specifically the shallow V shaped or arched shape slit of the distal end portion being arranged to extend in a direction that is not parallel to the axial direction of the main body (distal end of figs. 4, 7 and 8).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
